Chris –

Thanks. I am copying my HQ Congressional contacts who are prepping Mathy for

the hearing. Perhaps either you or Harry can send this also to Joshua Woodyard, Acting Director, Preparedness and Response Operations Division (PROD) who had sent out the initial e-mail which I did not receive directly.

Cathy –

Here are some Hot Topic bullets we prepared recently for Andrea Barbery for the upcoming ECOS meeting. I have pulled from that summary only the water, Superfund, Brownfields and Emergency Response (SPCC, RMP, etc.) related topics. As of now, I am not aware of any regional Brownfields events related to the Area-wide planning grants announced yesterday. Hope these are helpful for your hearing prep. - Brent

ARIZONA (Director Henry Darwin)

• [REDACTED] **Exide Technologies:** In 2014 EPA issued a Notice of Violation to Exide for excessive lead emissions. EPA's investigation, prompted by community concerns and ongoing investigations by state and local agencies, found that Exide violated federally enforceable lead emissions standards more than 30 times since September 2013. In August 2014, Exide received a federal grand jury subpoena seeking documents related to air emissions and materials transportation. EPA is working closely with state and local agencies to resolve compliance issues and address community health concerns, and the facility remains closed until it meets Air District requirements. Settlement negotiations are ongoing with Exide. [ENFORCEMENT CONFIDENTIAL]
